

ATTENTION PASSMORE AND WILT ROADS RESIDENTS

Beginning on August 8, 2022 through August 12, 2022, between 7:00am and 6:00pm (weather permitting), your street(s) will be constructed by a crew from E.J. Breneman, LP using a method which will recycle or reclaim the existing road. This work may last a day or more. The process will involve the application of emulsion or Portland cement. It is important to follow the directions of the traffic control personnel in order to prevent damage to your vehicle. If you are not sure – ASK.

We will complete the work in a timely manner in order to minimize any inconvenience to you.

Your street will remain open to local traffic while this roadwork is in progress to permit you access to your home or driveway. However, please do not drive in the fresh emulsion or cement at any time, as this will cause damage to your vehicle. Be alert for excavated areas, moving construction vehicles and workers. There may be a brief time that your driveway may be inaccessible if we are working in the immediate vicinity. We urge your patience.

This is an active construction zone! When driving past the operating construction equipment, please be courteous to the workers by driving slowly and following their directions. Please be alert for raised manhole covers, water boxes and miscellaneous structures.

Road recycling and reclamation helps everyone because it saves tax dollars, conserves the environment and saves time when compared to conventional construction. At the same time, you will be getting a brand-new street, with all potholes, cracks and bumps removed as the road is built stronger.

In a week or so, another work crew will apply a coat of smooth blacktop to finish the construction process.

Thank you for your cooperation during this road work. If you have any questions or concerns during the work, please speak to one of the workers.
